The new Caddy Pickup

The versatile and functional workhorse

One of the most successful vehicles ever produced by Volkswagen was the original Caddy Pickup. From its introduction in 1984 to its demise in 1992, it won a great many friends and equally as many plaudits.

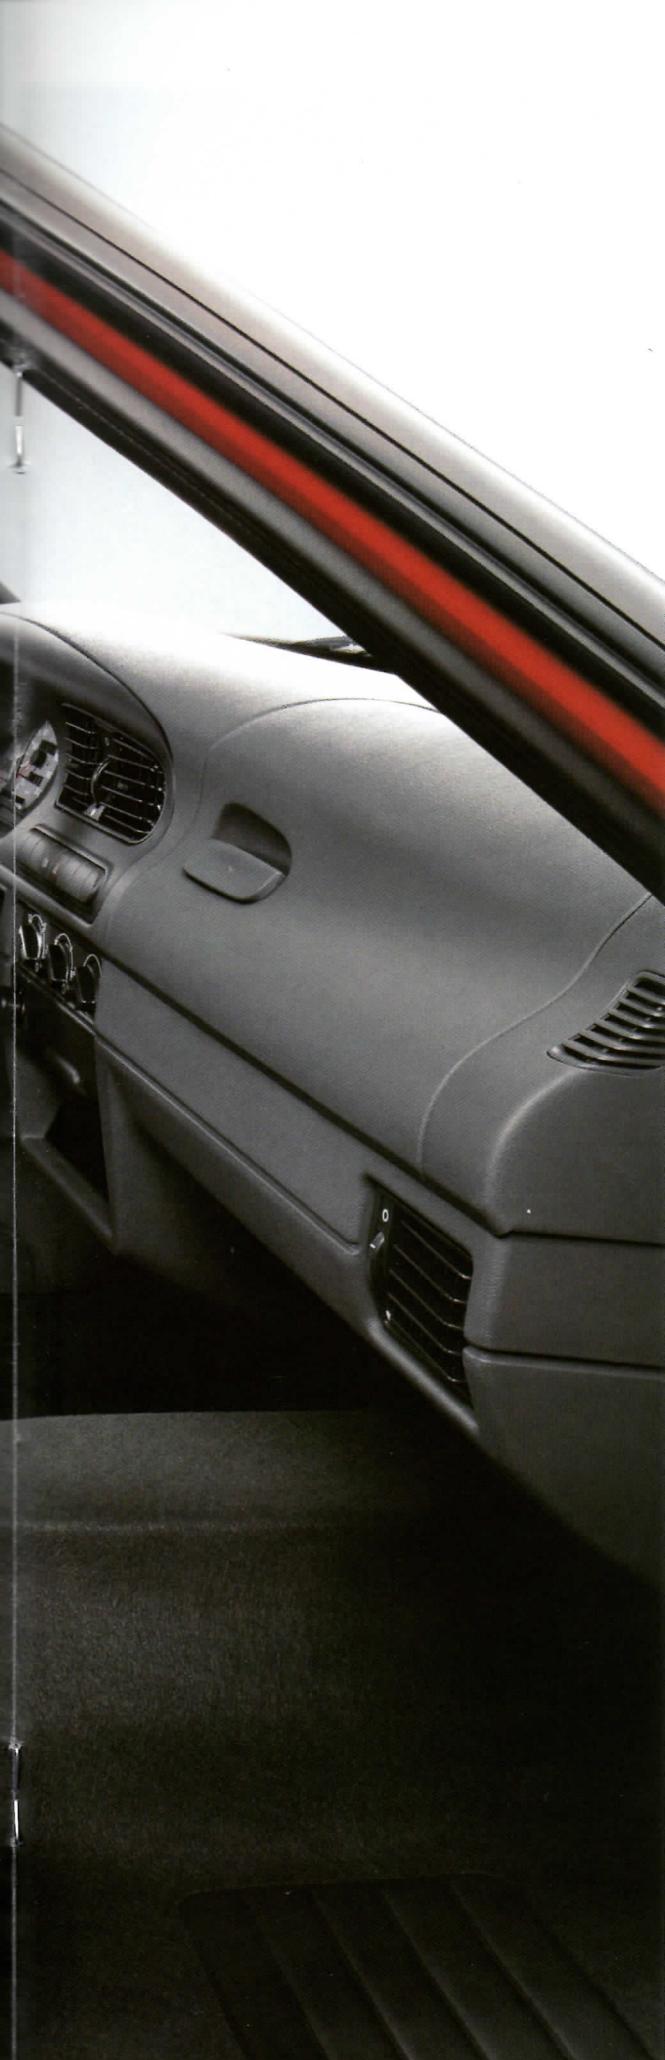

The key to this success was its simple no-nonsense design. Just big enough to carry a wide range of loads, rugged enough to take all that a demanding business could throw at it, and compact enough to cope well with the rigours of everyday motoring.

We are confident that the new Caddy Pickup will be a worthy successor. It too has a clean, functional, no-nonsense design. It has a payload of 605kg, a load length of 1550mm, a double skinned load compartment to withstand knocks and bumps, a strong tailboard with rigid support straps, load lashing rings and a practical plastic capping around the load area sides.

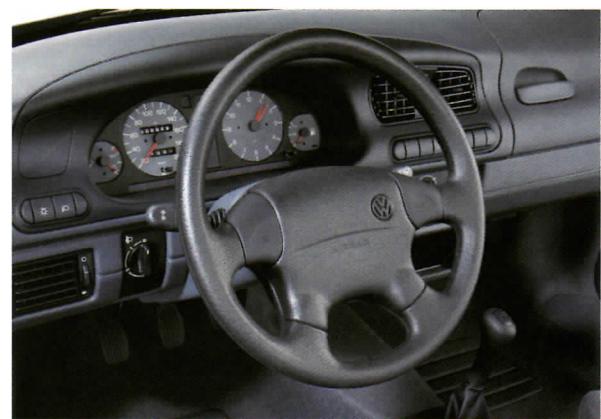

The new Caddy Pickup

Comfortable and easy to drive

The new Caddy Pickup is not just a functional load carrier, it is a comfortable and practical driving experience as well.

The seats are covered in an attractive, hard-wearing cloth. Power steering comes as standard, as does a stereo radio/cassette player. The instruments and controls are clearly laid out and easily fall to hand, and the door mirrors are internally adjustable. The stylish dashboard reminds you more of a quality passenger car than a practical little pick-up truck. The list of standard equipment even includes a pollen filter.

Safety and security have not been forgotten either. Air bags are an optional extra but many other safety measures come as standard.

The inherent strength of the unitary all-steel body shell is completed by side-impact bars in the doors and a strengthened bulkhead to resist possible forward load movement.

A collapsible steering column, padded steering wheel, head restraints and height adjustable 3-point seat belts with pretensioners, all add to the safety package. For your complete peace of mind an electronic engine immobiliser is also standard.

To make owning the new Caddy Pickup more appealing the range of optional extras includes ABS brakes, height adjustable steering, headlight washers and seat heating.

The new Caddy Pickup

Just the job for your business

The versatile new Caddy Pickup meets the transport needs of small and large companies. Whether it is the only commercial vehicle in your business or support for a larger fleet, the new Caddy Pickup will be a real benefit.

The proven 1.9 litre SD diesel engine provides performance and economy to match. It produces 64bhp at 4400rpm and maximum torque of 124Nm between 2000 and 3000rpm. Power is transmitted by a 5-speed gearbox driving the front wheels. As well as giving a top speed of 94mph this engine already complies with future EC directives for emission and noise standards.

The dual circuit braking system incorporates servo assisted front discs and self-adjusting rear drums. A load dependent brake pressure limiter ensures optimum braking at all times.

Independent suspension gives positive handling. At the front, triangular track arms with spring struts are assisted by an anti-roll bar. The rear suspension is a multi-arm configuration with coil springs and telescopic dampers.

So in total - from its characteristic grille to its practical load space - the new Caddy Pickup is a worthy successor, for many types of business use.

Volkswagen Van Centres

Specialist support for the new Caddy Pickup

Volkswagen Van Centres supply dedicated support for vans, with trained staff, flexible opening times, parts and accessories, service and repair, and of course new and used vehicles on display.

Van Centres can help you choose and purchase the right vehicle and provide comprehensive, reliable after-sales support too.

Service

Volkswagen approved service points throughout the world offer the following support:

- An extensive network of workshops all over the world.
- Specially equipped workshops with experienced, trained specialist personnel.
- Comprehensive stocks of genuine Volkswagen new and exchange parts.

A lubrication service is required at 5,000 miles and a major service is required every 20,000 miles.

If the vehicle does not cover 20,000 miles annually there is an additional inspection every 12 months.

Warranty

Mechanical warranty

There is a 1 year warranty with no mileage limit on all Volkswagen commercial vehicles and it is valid throughout the world.

Body protection warranty

Special rust-proofing treatment of internal body sections and panels, applied at the time of manufacture, guards against through-rusting from the inside. Should this occur during the warranty period rectification will be made free of charge, and is not subject to compulsory inspections as with other 'anti-corrosion guarantees.

Paintwork warranty

There are no special conditions attached and paintwork defects will be rectified without charge. Naturally, during the warranty period the vehicle should be cared for in compliance with the operating instructions.

Extended warranty

For total peace of mind your Volkswagen Van Centre can offer very competitive rates for extended warranty. Additional 12 or 24 month warranty schemes are available at extra cost.

Finance

A number of finance plans are available for business users, including Hire Purchase, Lease Purchase, Lease Rental, Contract Hire and Payment Insurance plans. Your nearest Volkswagen Van Centre can provide full details to suit your particular requirements.

Radio/Cassette programme

All Volkswagen commercial vehicles are fitted with a stereo radio/cassette as standard equipment. Customers may, however, 'trade-up' to even higher specification units or systems at extra cost upon request. Your Volkswagen Van Centre can provide full details of the 'trade-up' scheme.

Volkswagen Insurance

Special motor insurance policies for Volkswagen owners are available with special terms. For a quotation without obligation on telephone 0800 581185.

Tax Free Sales

For information on how to purchase tax free vehicles, contact your nearest Volkswagen Van Centre or call: 0800 585878.
